ZX400/ZX400i FCC COMPLIANCE STATEMENT FOR AMERICAN USERS

Federal Communication Commission Interference Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

FCC Caution: Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.

TO WHICH THIS DECLARATION RELATES IS IN CONFORMITY WITH THE FOLLOWING STANDARDS

FCC CFR Title 47 Part 15 Subpart B:2015 Class B,CISPR 2	2:2008 ANSI C63.4: 2014 ICES-003 Issue 6:2016, Class B

1-2 Getting To Know Your Printer

(ZX420i)

Front View

• Front View

Open The Printer Cover

2. Printer Setup

2-1 Loading the label roll

This printer supports the following printing methods:

Thermal transfer printing (TTP) : Requires a ribbon for transferring a printed image to a medium.

Direct thermal printing (DTP) : Does not require a ribbon, only thermal paper.

Please check which printing method you are using and alter the settings accordingly in the printer driver, printer menu, and/or software.

Place the label roll on the label supply hub, pushing it right up to the printer housing. (Do not apply too much pressure to avoid damaging the label stock.)

Then close the printer cover.

2-2 Loading & Removing the Ribbon

Loading Ribbon

Place a new ribbon on the ribbon supply hub.

The illustration as below shows you how to install the ribbon.

Pass the ribbon under the print head and back up on the other side.

Attach it to the empty ribbon core.

2-3 Connecting The Printer To The Host Computer

- Please make sure that the printer is switched off.
- > Connect the power cord to the AC adapter and connect the adapter to the printer.
- Connect the USB / parallel cable to the printer and host computer.
 (The type of cable may vary according to the products which you purchase.)
- > Switch on the printer. The LED indicator should now lights up.

2-4 Wizard CD Standard Installation

Step.01 Insert the Super Wizard CD in the CD/DVD drive of the host computer and the installation program should pop up automatically.

You will see the Welcome screen first. On the Welcome screen, choose "STANDARD INSTALLATION".

Step.02
The wizard will then ask you to make sure your USB and power cables are connected and that the power is turned on. Then click "NEXT".

Step.03 👄 The next screen you will see is, "Install the GoLabel Software and Windows driver". Click "NEXT" to continue.

NOTE

* If the Super Wizard program did not run automatically, you can either turn on the "Auto-run" setting for your CD/DVD driver or double-click the icon of CD/DVD driver to run the program manually.

Step.04 As the printer driver and GoLabel are installing, a screen will display a progress bar. While downloading completed you will see Installation completed. Click "NEXT" to continue.

Step.05 → You can also print a test label. If don't print a test label, the screen display as step 6.

NOTE

* If you need more resources, tools or reference documents, you can also find them on Super Wizard CD.

Just click "Other Choices" on the Welcome Screen to access the files.

Step.06 → Once the installation is complete, you can start to make and print labels with GoLabel or through the printer driver.

2-5 Wizard CD Other Choice Installation

Step.01 → Click "OTHER CHOICES" to next screen and select "PRINTER DRIVERS".

Step.02 Click "INSTALL SEAGULL SCIENTIFIC WINDOWS DRIVER" to next screen, and click "NEXT".

Step.03 👄 Select "I accept the terms in the license agreement", and click "Next" · then click "Finish" to step 4.

Step.04 m The Driver Wizard will guide you through the installation procedure. Select "Install printer drivers" and click

"Next".

3. Operation Panel

3-1 LED Operation Panel

(For ZX400i Series)

POWER Button

POWER BUTTON

Press the POWER button to turn on the printer, and the START UP SCREEN appears. The printer is on "ready to print" status, the LCD screen should display the message "READY" on the screen. When printer is turned on, hold and press down the POWER button for 3 second will turn the printer off.

FEED Button

Turn on the printer and press the FEED button.

When you press the FEED button, the printer will advance media until the FEED button is released.

If you are using continuous labels, pressing the FEED button will advance a length of media until the button is released.

If you are using media with gaps, pressing the FEED button once will advance only one label.

If the label does not stop at the correct position, you need to run the auto-detection function for your media,

please see Section 3.6 Label Calibration and Self-Test.

PAUSE PRINTING_FEED Button

Pressing the FEED button while the printer is in standby mode will set the printer to pause mode. In this mode, the printer can receive commands, but it will only process them when it is reset to standby mode. Pressing the FEED button again will reset the printer to standby mode.

Pressing the FEED button during printing will interrupt printing. When the FEED button is pressed again, the printer resumes printing. Example: While a 10-label print job is running, you press the FEED button to pause the printer. Two of the labels have been printed. To resume printing and print the remaining eight labels, you will need to press the FEED button again.

CANCEL PRINTING_FEED Button

Press and hold the FEED button for 3 seconds during printing cancels a print job. The current print job is cancelled. Example: While a 10-label print job is running, you press the FEED button. Two of the labels have been printed. The print job is cancelled and the remaining eight labels will not be printed

To resume printing and print the remaining eight labels, you will need to press the FEED button again.

CANCEL PRINTING_FEED Button

Press and hold the FEED button for 3 seconds during printing cancels a print job. The current print job is cancelled. Example: While a 10-label print job is running, you press the FEED button. Two of the labels have been printed. The print job is cancelled and the remaining eight labels will not be printed

3-2 LCD Interface Introduction

Getting Started

Press the POWER button to turn on the printer, and the START UP SCREEN appears.

If the printer is on "ready to print" status, the LCD screen should display the message "Ready" on the screen.

Please keep pressing button and wait for the timer to be filled, then the LCD interface will enter into the MAIN PAGE for SETTING MODE. You can make various setting functions in SETTING

Operations on Setting Page

On MAIN PAGE, press or button to move the cursor and select the functions. Select a designated function and press FEED button, you will enter the SETTING PAGES for the function.

On SETTING PAGES, press or to select the setting items. Select a designated function and press FEED button, you will enter the SETTING VALUE PAGES for the function.

Press FEED button will apply the setting value you just selected, and the red tick will appear to mark the value.

NOTE

* The blue arrow indicates the value you are selected.

$$\rightarrow$$

** The red tick indicates that the selected value is applied now.

Exit from Current Page to Ready Status

The icon on top-left corner displays the capture of upper level screen and also guides you back to upper level with left or up arrow.

On SETTING VALUE PAGES, press 4 button will go back to the upper level screen.

On SETTING PAGES, press ^A button will go back to the MAIN PAGE

On MAIN PAGE, select the "EXIT" icon and press the FEED button to exit from SETTING MODE and the printer goes back to READY status.

3-3 LAN Setting

Operations on Setting Page

On MAIN PAGE, press 4 or button to move the cursor and select the functions.

Select a designated function and press FEED button, you will enter the SETTING PAGES for the function.

On LAN Setting PAGE, press for button to select the setting items.

Select DHCP and press FEED button, you will be able to setup DHCP function

Operations on Setting Page

On MAIN PAGE, press for button to move the cursor and select the functions. Seclect a designated function and press FEED button, you will enter the SETTING PAGE for the

The default of LCD Setting is Disable. Press A or T button to change the setting values.

Select vertice button again to setup the password	Disable Enable
	1111

Press FEED button twice to save the setting

	LCD Password

3-6 Label size calibration and Self Test Page

The printer can automatically detect and store label height. That means the host computer does not need to transmit the label height to the printer. And the self-test function lets you check whether the printer is functioning normally. Here is how you run the label size calibration and self test.

Step.01 - Check that the label stock is loaded correctly.

Step.02 Switch off the printer.

Step.03 Switch the printer on again, keeping the FEED button pressed. When the READY LED starts to flash red and the STATUS LED lights up orange, release the FEED button. The printer will now measure the label stock and store the label height

Step.04 - Once the printer has successfully measured the label stock, it will print a self-test label.

The contents of a self-test printout are listed below.

(The data below is for reference only, actual result may vary according to each situation.)

Label Calibration Button

A hardware button to make a Label Calibration while printer encountering "Media Error" during the cases when first-time printer start up or change label or ribbon to another type, such as change using gap label to continuous or black mark labels.

NOTE

* Press C-button is equivalent to the auto-sensing command "~S,SENSOR" that will cancel on-printing-job and make the Label Calibration immediately.

(For ZX400i Series)

In the event of a problem that prevents normal functioning of the printer, you will see an error message on LED indicators and

hear some beep signals. Please refer to below table for the error alerts.

Operation Panel Status	Туре	Beeps	Description	Solution
File System Full			The memory is full. The printer prints the message "File System full ".	Delete unnecessary data or install additional memory.
FILE Not Found	File Error	2 x 2 beeps	Unable to find file. The printer prints the message "File Name not found"	Use the "~X4" command to print all files. Then check whether the files exist and whether the names are correct.
F/W ver.: 64.000			A file of the same name already exists. The printer prints the message "Duplicate Name".	Change the name of the file and try storing it again.

(For ZX400 Series)

Red Light flashes

In the event of a problem that prevents normal functioning of the printer, you will see an error message on LED indicators and hear some beep signals. Please refer to below table for the error alerts.

3-8 USB Host

Definition : USB Host port supports either device : USB memory stick, keyboard or scanner.

Purpose:

- USB memory stick : It extends the user memory space up to 32GB for Graphic, Font, Label Format, DBF and Command files downloading. The printer's Firmware also can be updating if copy new version of Firmware into USB memory stick.
- Connecting an USB keyboard to printer for "Keyboard Mode" mode operation.
- Plug-in an USB scanner to operate the printer in "Keyboard Mode".

Usage of Extended Memory

- USB memory stick : It supports hot-plugging function; printer will create a Folder "\LABELDIR" and switch "User Flash" to "Extended Memory" automatically while user plugs an USB memory stick into a GoDEX printer.
- Connect the USB Stick plugged -in printer to PC via USB Device or Ethernet port and run "GoLabel" software to download Graphic, Font, Label Format, DBF and Command files to the printer.
- Detail download procedures, please refer to "GoLabel On-line Help".

Usage of Firmware Update

- Remove USB memory stick from printer and plug-in it to a PC's USB port; delete Firmware "*.bin" file from "\LABELDIR\FW" of USB memory stick if it existing; or create a Folder "\LABELDIR\FW" to USB memory stick if it doesn't existing.
- Copy a new version of Firmware "xxxx.bin" to the Folder "\LABELDIR\FW"; and then remove USB and plug-in back to the printer that going to update Firmware.
- The printer will update the Firmware automatically when plug-it-into the printer and printer find-out the Firmware in "\LABELDIR\FW" is newer version.
- Don't remove the USB memory stick out while it's under updating with "Flash Writing..."message that displays on LCD panel.

USB Keyboard

When plug-in an USB keyboard to the printer, LCD touch panel will display "Enter Standalone", press the "Y" key on keyboard to entering to the dialog for "Keyboard Mode" operation. Here have six sub-dialogs "Recall Label" "Country Code" "Code Page" "Clock Setting" "Database Setting"

"Label Edit" is able operating by keyboard as follow definition:

- 1. Press "ESC" key to exist from "Keyboard Mode" or back to previous dialog
- 2. Press "F1", it will let the printer from "Home Page" mode entering into "Keyboard Mode"
- 3. Press "Enter", "Arrow" and "Alphabetic" keys as the usual in PC that will perform the key-in function of "Keyboard Mode".

Scanner

When plug-in an USB scanner to the printer, LCD touch panel will display "Enter Standalone", tap the

"Y" to entering the dialog of "Keyboard Mode" operation.

Scanner is using in "Keyboard Mode" to scanning the "Serial Number, Variable" and Print Quantity while the printer prompts a message on LCD touch panel and wait for data input.

^{*} The USB Host port on GoDEX printer is without "HUB" function.

^{**} The USB Memory Stick supports with "FAT32"Disk Format and up to 32GB only. The certified venders are Transcend, Apacer, Patriot, Consair and Kingston.

^{***} The download function for Graphic, Font, Label Format, DBF and Command files is operated by GoLabel of PC and must go through the a "i" "x" model printer itself.

^{****} On a PC, user may copy entire folder"\LABELDIR" from USB memory stick to PC or vice-versa. Copy a sub-folder or individual file in "\LABELDIR" to PC or vice-versa is not supported.

4 NetSetting for Ethernet

4-1 Installing the NetSetting software

The NetSetting software is used to manage the network configurations when connecting the printer via Ethernet port. It is available on product CD or can be downloaded from official website. To install the NetSetting, please follow below steps.

Step.01 > Insert the product CD in the CD/DVD drive, and click "OTHER CHOICES" buttom.

Step.02 **Select** "ETHERNET".

GoDEX	the English	GoDEX		OTHER CHOICES

Step.03 - Click "Install Ethernet NetSetting Software", installation screen as right diagram, click "Next".

Step.04 - Specify the "Installation Folder", then click "Next" to installing.

Next >

Step.05 → Once the installation is completed, you will see the NetSetting icon on your desktop as right diagram.

4-2 The Interface of NetSetting

GoDEX printer can also be used through a network connection (as a remote network printer), make sure the printer connected to the Internet and the power cord, you can use the Interface of NetSetting to search connected network printers.

Step.01 — Click the NetSetting icon to start the program, you will see the start page as left diagram. Click the magnifier icon to search the Godex printers which are connected via Ethernet port in you network environment (as right diagram).

Step.02
There are six tabs on the top of interface which can configure different types of network settings. But for the data security reason, you need correct password to enter the configuration pages.

NOTE

^{*} The default password is "1111", you can change the password later from the "IP Setting" tab.

IP Setting

The IP Setting tab can change the printer name, Port number, Gateway setting and the password for configuring the printer. You can also set the printer's IP address ether by DHCP or by Static IP.

GoDEX	NetSetting IP Setting	
/ 🛋 🙎	18 🔊	
Printer Name	ВР500Ц	Length(1~16)
Port No Default Gateway	9100 P	
Password		Length(1~4)
Get IP From Static IP	n DHCP Server	
IP Address	: 192 165 102 111 x	
Subnet Mask	255 255 255 D T	
Set	Refresh	

You can press "Set" button to apply the settings and "ReGet" button to refresh the setting values.

NOTE

* To fully benefit from the NetSetting software, you should be familiar with basic networking principles. Please contact your network administrator for related network setting information.

* When enabling DHCP, if you find the IP Address as: IP = 169.254.229.88, Net mask = 255.255.0.0, Gateway = invariable (last value), the IP Address is invalid.

Alert Path Setting

NetSetting will send the alert messages to designated mail account when the error happened on printer. The alert messages are sent by SMTP (Simple Mail Transfer Protocol) or SNMP (Simple Network Management Protocol). You can set or change the configurations of SMTP and SNMP on this "Alert Path Setting" tab.

	Alert Mail Setting	
	N 🔝 🍤	
Enable SMTP Alert Message I	Notification	
Login Account	default	Length(1~64)
Login Password	******	Length(1~16)
Server IP Address	192.168.D.1	XXX.XXX.XXX
Mail Subject	Barcode printer message	Length(1~60)
Mail From Address	default@default.com	Length(1~32)
Mail To Address	default@default.com	Length(1~32)
Duration Cycle	1	0 ~ 168 Hours
Event Counter	5	1~100
Enable SNMP Alert Message	Notification	
SNMP Community.	public	Length(1~16)
SNMP Trap Community	public	Length(1~16)
Trap IP Address	192.168.0.1 I	xxx.xxx.xxx.xxx

Alert Message Setting

For the alert message notification function, you can decide which error cases need to be sent out to the operator. Moreover, the alert messages can be set to be sent by SMTP, SNMP or both.

User Command

The "User Command" tab provides a communication interface for operator to control the printer. Input printercommands in "Input Command" window and press "Send Command" button, the commands will be sent to the printer.

For some commands that will return response message, the message will be displayed in "Output Message" window.

Gol	NetSetTing Terminal	_	a a

Recover To Factory Settings			

In addition to the firmware update, you can press "Recover To Factory Settings" button to restore the printer configurations back to factory default.

5 Accessories

5-1 Preparation Steps

Before installing the optional modules, please make some preparations as follows.

1. Turn off the printer :

Remember to switch off the printer before installing any module.

2. Open the printer cover

NOTE

^{*} Remember to switch off the printer before installing the cutter.

^{**} Do not use to cut adhesive labels! Glue residue will be left on the cutter blade and impair its functioning.

5-2 Installing the Cutter

5-2-1 Installing the Guillotine Cutter

Overview Of Guillotine Cutter

Steps for installing the Guillotine Cutter:

(Power off the printer and remove the power cable before installing the guillotine cutter module)

1. Remove the screw (as circle indicated).

NOTE

- * Power off the printer and remove the cable from the connector before installing guillotine cutter module.
- ** Labels with adhesive glue are not applicable or otherwise could result to malfunction.
- *** Applicable label size is at maximum width of 118mm and minimum length of 30mm. (Usage with labels outside this range will be excluded from warranty terms)
- **** Stop position (^Ex command) should set to 26~27 through GoLabel before using the guillotine cutter.

 Direct the cutter's cable through the platen bracket of the printer.

5. Engage the catchs of the cutter module firmly into the printer.

6. Tighten the screws and plug the cutter's cable into the printer in the direction of the arrow.

NOTE

* Printer power should be off when plugging the connector to avoid malfunction

5-2-2 Installing the Rotary Cutter

Overview Of Rotary Cutter

Steps for installing the Rotary Cutter:

(Power off the printer and remove the power cable before installing the guillotine cutter module)

NOTE

- * Power off the printer and remove the cable from the connector before installing rotary cutter module.
- ** Labels with adhesive glue are not applicable or otherwise could result to malfunction.
- *** Applicable label size is at maximum width of 118mm and minimum length of 30mm. (Usage with labels outside this range will be excluded from warranty terms)
- **** Stop position (^Ex command) should set to 29~30 before using the rotary cutter.

 Remove the cover panel by pushing to right-hand side.

3. Stick the hub onto the circled area.

04

 Direct the cutter's cable through the platen bracket of the printer.

5. Engage the catchs of the cutter module firmly into the printer.

6. Plug the cutter's cable into the printer in the direction of the arrow.

NOTE

* Printer power should be off when plugging the connector to avoid malfunction

5-3 Installing The Label Dispenser

The Overview of the Label Dispenser

Steps for installing the Label Dispenser:

(Power off the printer and remove the power cable before installing the label dispenser module)

NOTE

* A label liner thickness of 0.006 mm ± 10% and a weight of 65 g/m2 ± 6% are recommended.

** The label dispenser will take labels up to a max. width of 110 mm, and labels should be at least 25 mm high.

*** When using the label dispenser, set the stop position to 9 mm.

 Remove the cover panel by pushing to right-hand side.

4. Direct the label dispenser's cable through the platen bracket of the printer.

5. Engage the catchs of the label dispenser module firmly into the printer.

6. Plug the label dispenser's cable into the printer in the direction of the arrow.

NOTE

^{*} Printer power should be off when plugging the connector to avoid malfunction

6 Maintenance and Adjustment

6-1 Installing / removing the print head module

1. Open the printer cover.

3. Turn the print head counterclockwise to a top right position

4. Turn the print head counterclockwise to a top right position

NOTE

* Remember to switch off the printer before removing the print head module.

6-2 Adjusting the print line

1. Open the printer

cover.

 Turn the print head counterclockwise to a top right position

If no improvement is visible, turn the screws(A) clockwise or counterclockwise as far as possible and be sure to align with the indicator board and indicator line. Repeat the adjustment process until printing quality has improved.

6-3 Adjusting ribbon tension

You can adjust the ribbon tension by turning the ribbon shaft knob (see illustration) clockwise or counterclockwise. There are 4 possible settings, which is marked on the ribbon supply hub.

- #1: Tension is the highest
- #4: Tension is the lowest

If the tension is so low that the ribbon does not move forward, you need to reduce the tension of the ribbon supply hub. To set the tension, press in the knob and turn it clockwise or counterclockwise as required.

Increasing the tension of the ribbon rewind hub will remove any wrinkling of the ribbon during printing, which results from the use of different ribbon materials. (For details about the wrinkling/creasing of ribbons, see Section 6-6.)

If you are using a very narrow ribbon, the printer may not move the label stock forward (particularly with a ribbon that is less than 2" wide). In that case, reduce the tension by turning the knob of the ribbon supply hub counterclockwise.

6-4 Cleaning the thermal print head

Dirt on the print head or ribbon may result in inadequate print quality (there are only partial images on the label). The printer cover should therefore be kept closed when possible. Keeping dirt and dust away from the paper or labels ensures a good print quality

and a longer lifespan of the print head. Here is how you clean the print head:

- 1. Switch off the printer.
- 2. Open the printer cover.
- 3. Remove the ribbon.
- 4. Release the print head by turning the print head release lever.
- 5. To remove any label residue or other dirt from the print head

(see Red arrow), please use a soft lint-free cloth dipped in alcohol to wipe.

NOTE

* The print head should be cleaned once a week.

** Please make sure that there are no metal fragments or other hard particles on the soft cloth used to clean the print head.

6-5 Adjusting the balance and print head tension

1. Open the printer

2. Using a screwdriver or a

coin to loosen the screwcoin to loosen the screw

When using a variety of label stock

and ribbons, the ink may not be evenly distributed. If there is no printed image on one side of the paper, or the ribbon wrinkles, the print head pressure must be readjusted using the TPH spring boxes.

Move the TPH spring boxes as shown in the illustration to change the print head pressure. The wider the label you are using, the further apart the TPH spring boxes must be moved away from

each other. If there is no quality improvement,

you need to change the pressure on the TPH spring boxes.

Reset Mark (A)
 Mark (B)

Turning the screw left increases the pressure,

while turning it right reduces the pressure.

Be sure not to turn the screw so that it goes below Mark(B).

6-6 Ribbon shield settings

The use of different ribbon materials may cause wrinkling of the ribbon, which in turn affects the print result as illustrated by the examples in (a) and (b). To change the print quality, you can adjust the ribbon shield screws. If your print result looks like the example in (a), you need to turn ribbon shield screw clockwise. If your print result looks like the example in (b), you need to turn ribbon shield screw counterclockwise.

To keep track of the change in print quality, you should adjust the screws by half a turn at a time. Print a test page. If there is no improvement in the print result, turn the screw by another half turn. Do not turn the adjustment screw more than two full turns(360°).

NOTE

* If you adjust the screw by more than two full turns, the paper feed may no longer function correctly. In that case, unscrew the ribbon shield screws to align the reset mark and restart the adjustment process.

Unscrew the screw at the bottom of cutter .

Remove the cutter cover. Clean and remove jammed paper. Reinstall CUTTER back onto printer.

NOTE

- * Remember to switch off the printer before removing the CUTTER.
- ** The label medium should be at least 30 mm long to ensure correct functioning of the cutter.

6-8 Troubleshooting

Problem	Solution
The printer is switched on but the LED does not light up.	 Check the power supply. Please see the Section 2.4
The LED lights up red and printing is interrupted.	 Check the software settings (driver settings) or command codes. Look for the error alert in the table in Section 3.3. Error Alerts. Check whether the print mechanism is closed correctly. Please see the Section 3.3
The label stock passes through the printer but no image is printed.	 Please make sure that the label stock is loaded the right side up and that it is the suitable material. Choose the correct printer driver. Choose the correct label stock and a suitable printing mode.
The label stock jams during printing.	 Clear the paper jam. Remove any label material left on the thermal print head and clean the print head using a soft lint-free cloth dipped in alcohol. Please see the Section 6.1
There is no printed image on some parts of the label.	 Check whether there is any label material or ribbon stuck to the the print head. Check for errors in the application software. Check whether the starting position has been set correctly. Check the ribbon for wrinkles.
There is no printed image on part of the label or the image is blurred.	 Check the thermal print head for dust or other dirt. Use the internal "~T" command to check whether the thermal print head will carry out a complete print job. Check the quality of the print medium.
The printed image is positioned incorrectly.	 Check whether there is paper or dust covering the sensor. Check whether the label stock is suitable. Contact your supplier. Check the paper guide settings.
Skipping labels during printing.	 Check the label height setting. Check whether there is dust covering the sensor. Run the auto-detection function. Please see the Section 3.2
The printed image is blurred.	 Check the darkness setting. Check the thermal print head for dust or dirt. Please see the Section 6.1
The cutter does not cut off the labels in a straight line.	• Check whether the label stock is positioned straight.
The cutter does not cut off the labels completely.	• Check whether the label is more than 0.2 mm thick.
When using the cutter, the labels are not fed through or cut off incorrectly.	 Check whether the cutter has been correctly installed. Check whether the paper guides are functioning correctly.
The label dispenser is not functioning normally.	 Check whether there is dust on the label dispenser. Check whether the label stock is positioned correctly.

NOTE

* If any problems occur that are not described here, please contact your dealer.

APPENDIX- INTERFACE

Parallel port

Handshaking	: DSTB is sent to the printer, BUSY to the host computer
Interface cable	: Parallel cable compatible with IBM computers
Pinout	: See below

Pin No.	Function	Transmitter
1	/Strobe	Computer / printer
2-9	Data 0-7	Computer
10	/Acknowledge	Printer
11	Busy	Printer
12	/Paper empty	Printer
13	/Select	Printer
14	/Auto-Linefeed	Computer / printer
15	N/C	
16	Signal Gnd	
17	Chassis Gnd	
18	+5V, max 500mA	
19-30	Signal Gnd	Computer
31	/Initialize	Computer / printer
32	/Error	Printer
33	Signal Ground	
34-35	N/C	
36	/Select-in	Computer / printer

Serial Port

Default settings : Baud rate 9600, no parity, 8 data bits, 1 stop bit, XON/XOFF protocol and RTS/CTS

DB9 Socket			DB9 Plug
-	1	1	+5V, max 500mA
RXD	2	2	TXD
TXD	3	3	RXD
DTR	4	4	N/C
GND	5	5	GND
DSR	6	6	RTS
RTS	7	7	CTS
CTS	8	8	RTS
RI	9	9	N/C
Computer			Printer

USB Port

٠

Computer Connector : Type A

Pin NO.	1	2	3	4
Function	VBUS	D-	D+	GND
CON	nector Type	. 19000		
Pin NO.	1	2	3	4

Ethernet (RJ-45)

PIN NO.	FUNCTION
1	T+
2	T-
3	R+
4	N/C
5	N/C
6	R-
7	N/C
8	N/C

Notice

 **** The total current to the serial port may not exceed 500mA.

GoDEX Printer Compliance Insert

Note: This equipment may be used on an IT power system.

For Users in English Speaking Regions (en)

Caution: This marking indicates that the user should read all included documentation before use.

The users of this product are cautioned to use accessories and peripherals approved by GoDEX International Co. Ltd. The use of accessories other than those recommended or changes to this product that are not approved by GoDEX International Co. Ltd. may void the compliance of this product and may result in the loss of the user's authority to operate the equipment.

FCC Digital Emissions Compliance

This equipment has been tested and found to comply with the limits for a CLASS A digital device pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates uses and can radiate radio frequency energy and if not installed and used in accordance with the instructions may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at own expense.

Canadian Digital Apparatus Compliance

This Class A digital apparatus meets all requirements of the Canadian Interference-Causing Equipment Regulations

CE Marking: Refer to the Declaration of Conformity for a list of the EU Directives and Standards that this product complies with.

Für Anwender in Deutschland (de)

Vorsicht: Diese Kennzeichnung weist darauf hin dass der Benutzer vor dem Gebrauch alle mitgelieferten Unterlagen lesen soll.

Die Benutzer dieses Produkts werden darauf hingewiesen nur Zubehörteile und Peripheriegeräte zu verwenden die von GoDEX International Co. Ltd. genehmigt sind. Falls nicht empfohlene Zubehörteile verwendet oder an diesem Produkt Änderungen vorgenommen werden die nicht von GoDEX International Co. Ltd. genehmigt sind kann dadurch die behördliche Konformität des Produkts verfetzt werden und der Benutzer die Berechtigung zur Verwendung des Geräts verlieren.

CE-Kennzeichnung: Die Konformitätserklärung enthält eine Liste der EU-Richtlinien und Normen denen das Produkt entspricht. Warnhinweis

Dies ist ein Produkt der Klasse A. In Wohnumgebungen kann dieses Produkt Funkstörungen verursachen. In diesem Fall obliegt es dem Anwender angemessene Maßnahmen zu ergreifen.

Pour les utilisateurs canadiens et français (fr)

Attention: Ce marquage indique que l'usager doit avant l'utilisation lire toute la documentation incluse.

Attention: Pour la source d'alimentation utilisez GoDEX International Co. Ltd. Il ne contient aucune pièce réparable par l'utilisateur.

Utilisateurs de ce produit sont avisés d'utiliser des accessoires et des périphériques approuvés par GoDEX International Co. Ltd. L'utilisation d'accessoires autres que ceux recommandés ou des changements à ce produit qui ne sont pas approuvés

par GoDEX International Co. Ltd. peuvent annuler la conformité de ce produit et mettre fin au droit qu'a l'usager d'utiliser l'équipement. Conformité aux normes canadiennes sur les appareils numériques

Cet appareil numérique de la classe A respecte toutes les exigences du Réglement sur le matériel brouilleur du Canada. AVERTISEMENT: Il s'agit d'un produit de classe A. Dans un environnement domestique ce produit pourra provoquer des interférences radio auquel cas l'utilisateur pourrait avoir à prendre de mesures adéquates.

適用於臺灣使用者 (zh-tw)

注意:此標誌表示使用者應在使用前先閱讀所有隨附的文件。

本產品的使用者必須小心使用科碱股份有限公司許可的配件與週邊設備。使用非上述建議的配件,或是在未經科碱股份有限公司許可的情況下變更本產品可能會使得本產品的相容性失效,並且使得使用者 喪失操作設備的權力。

請使用科誠股份有限公司電源。無使用者可自行維修之零件。
